

## Studies goedgekeurd en gestart in 2022

Afdeling	Titel onderzoek	Volledige titel	Mono- / Multicenter	WMO-plichtig	Type onderzoek
Alliantie Voeding in de Zorg	XtraFit Studie	Voeding- en beweegadvies bij patiënten met een colorectaal carcinoom	mono	nee	observationeel onderzoek
Anesthesiologie	Practice variation in MDT meetings in the Netherlands	Practice variation in preoperative multidisciplinary team discussions for high-risk noncardiac surgical patients in the Netherlands: A multicenter prospective observational study	multi	nee	observationeel onderzoek
Cardiologie	HF-REVERT Study	Phase 2, Multicenter, Randomized, Parallel, 3-arm, Placebo-controlled Study to Assess Efficacy and Safety of CDR132L in Patients with Reduced Left Ventricular Ejection Fraction ( $\leq 45\%$ ) After Myocardial Infarction	multi	ja	interventie-onderzoek (geneesmiddel)
Cardiologie	PREVAIL Studie	Obicetrapib and Cardiovascular Outcomes: A Placebo-Controlled, Double-Blind, Randomized Phase 3 Study to Evaluate the Effect of 10mg Obicetrapib in Participants With Atherosclerotic Cardiovascular Disease (ASCVD) Who Are Not Adequately Controlled Despite Maximally Lipid-Modifying Therapies	multi	ja	interventie-onderzoek (geneesmiddel)
Cardiologie	ASPIRE-AF Study	Anticoagulation for Stroke Prevention In patients with Recent Episodes of perioperative Atrial Fibrillation after noncardiac surgery	multi	ja	interventie-onderzoek (geneesmiddel)
Cardiologie	RESTORE-1 Trial	A Phase 3, Randomized, Double-Blind, Placebo-Controlled Trial of Flecainide Acetate Inhalation Solution for Cardioversion of Recent-Onset, Symptomatic Atrial Fibrillation to Sinus Rythm	multi	ja	interventie-onderzoek (geneesmiddel)

Cardiologie	CELEBRATE Study	A Phase 3 prospective, blinded, randomized, placebo controlled, international multicenter study to assess the safety and efficacy of a single subcutaneous injection of zalunfiban in subjects with ST-elevation myocardial infarction in the pre-hospital setting	multi	ja	interventie-onderzoek (geneesmiddel)
Cardiologie/ Alliantie Voeding in de Zorg	Voed je Beter – Zelf aan de slag met de Eetscore	Voed je Beter: Inzet van de Eetscore op de polikliniek cardiologie	mono	nee	observationeel onderzoek
Gynaecologie	URIC Trial	Biobank Urine Controles Pathologie	mono	nee	biobank
Heelkunde	Snapshot CCC	Snapshot complex coloncarcinoom	multi	nee	statusonderzoek
Heelkunde	The QUILT study: a stepped wedge cluster randomized trial study	The QUILT study: quilting sutures in patients undergoing breast cancer surgery: a stepped wedge cluster randomized trial study	multi	nee	interventie-onderzoek (chirurgische techniek)
Heelkunde	MelMarT-II	Melanoma Margins Trial (MelMarT-II): A Phase III, multi-centre, multi-national randomised control trial investigating 1cm v 2cm wide excision margins for primary cutaneous melanoma	multi	ja	interventie-onderzoek (chirurgische techniek)
Heelkunde	DESCARTES Study	De-ESCAting RadioTherapy in patients with pathologic complete rESponse to neoadjuvant systemic therapy	multi	ja	observationeel onderzoek
Heelkunde	Feed your feet	Screening methods for nutritional status in diabetic foot ulcer patients	mono	nee	observationeel onderzoek
Hematologie	Klonaliteit B-cellymfomen	Klonale verwantschap en genetische landschap van terugkerende B-cel lymfomen: een sleutel naar therapie op maat	multi	nee	statusonderzoek en weefselanalyse
Hematologie	Vita-study	Health-Related Quality of Life and disease-specific symptoms among Lymphoma survivors: A longitudinal PROFILES registry study	multi	ja	observationeel onderzoek
Intensive Care	Long-term muscle protein synthesis in ICU patients (D2O ICU)	The assessment of long-term in vivo muscle protein synthesis rates in ICU	multi	ja	observationeel onderzoek

		patients using deuterated water methodology			
Intensive Care	COFEED-19 Studie	Association between protein and caloric intake and 90-day mortality in COVID-19 patients on the ICU	mono	nee	observatoneel onderzoek
Intensive Care	The CONFUCIUS oral protein supplementation trial	CONvalescence of FUNctional outcomes after ICU Stay by oral protein supplementation the CONFUCIUS oral protein supplementation trial	mono	ja	interventie-onderzoek (voeding)
Intensive Care	PRINCIPE Study	Protein provision in critically ill patients: Associations of PRotein INTake per kilogram lean body mass estimated by bioelectric impedance analysis and Clnical outcome in Critically Ill PatiEnts	mono	nee	observatoneel onderzoek
Intensive Care	LECTURE Study	LEAn body mass development in CriTically ill patients, obtained by bioelectRical impEdance analysis: a prospective observational cohort study	mono	nee	observatoneel onderzoek
Intensive Care	PRECISE substudies	PGE2 levels, autophagy flux and mitochondrial function in ICU patients on enteral nutrition	mono	ja	observatoneel onderzoek
Intensive Care	EPIC Study	A longitudinal investigation of Energy exPenditure and substrate utilization In Critically ill patients (EPIC): a prospective observational multi-center study	multi	nee	observatoneel onderzoek
Intensive Care	SEAL Trial	Safety and efficacy of inhaled pegylated adrenomedullin (PEG-ADM) in patients suffering from Acute Respiratory Distress Syndrome (ARDS): a double-blind, randomized, placebo-controlled, multicenter Phase 2a/b clinical trial	multi	ja	interventie-onderzoek (geneesmiddel)
Intensive Care	Evaluatie MUTUAL intervention (MUltidisciplinary Timely Undertaken Advance Care Planning)	Evaluatie poliklinische advance care planning (ACP) gesprekken / Evaluatiegesprek nadenken over toekomstige behandelkeuzes	mono	nee	statusonderzoek/ kwalitatief onderzoek met interviews
Interne Geneeskunde	FAST I Study	Fully Automated glycemic control with ultrarapid insulin in a bihormonal closed	multi	ja	interventie-onderzoek

		loop System in patients with Type 1 diabetes			
Interne Geneeskunde	Ionis Essence study	Olezarsen (ISIS 678354) in Patients with Hypertriglyceridemia and Atherosclerotic Cardiovascular Disease (Established or at Increased Risk for), or with Severe Hypertriglyceridemia	multi	ja	interventie-onderzoek (geneesmiddel)
Interne Geneeskunde/ Alliantie voeding in de Zorg	Voed je Beter met Diabetes	Voed je Beter met Diabetes type 2: de effecten van gepersonaliseerde voedingsbegeleiding om de inname van vezelrijke voeding te verhogen op het cardiometabool risico bij mensen met type 2 diabetes	multi	ja	interventie-onderzoek (voeding)
KCHL	HbA1c project	Seizoensinvloed op de gemiddelde HbA1c-waarde in de Nederlandse diabetespopulatie: data-analyse over 2018-2021	multi	nee	retrospectieve data-analyse.
KCHL	Tests voor actief vitamine B12	Multicenter evaluation of the active B12 test	multi	nee	laboratorium analyses
Klinische geriatrie	Magnesium status and cognition	The association between magnesium status and cognitive status	v	nee	cross-sectioneel onderzoek
Longziekten	Decision aid tool for NSCLC	Pilot study to test a patient decision aid tool for Stage I-II non-small cell lung cancer	multi	nee	pilot study
Longziekten	PRO-Lung Study	Patient reported outcomes in lung cancer patients	multi	nee	gebruik van een app voor monitoring
Longziekten	Disease characteristics stage I-III NSCLC	Retrospective study describing treatment patterns & real-world clinical outcomes of early stage / locally advanced NSCLC patients	multi	nee	observatieel onderzoek
Maag-Darm-Leverziekten	Move-It	Treatment of at least moderate idiopathic or diabetic gastroparesis	multi	ja	interventie-onderzoek (geneesmiddel)
Maag-Darm-Leverziekten	GLYSIMI Study	Elucidating the role of human Small Intestine Microbiota in Interpersonal differences in GLYcemic responses upon consumption of food products. A proof of principle study.	mono	ja	interventie-onderzoek (voeding)

Maag-Darm-Leverziekten	Direct-CD Study	A Prospective Multicenter Randomized Controlled, Open-label Study to Compare the Efficacy of Subcutaneous Infliximab with and without Concomitant Immunosuppression in the Treatment of Moderate to Severe Crohn's Disease	multi	ja	interventie-onderzoek (geneesmiddel)
Maag-Darm-Leverziekten	SUCCEED-EXACT Study	Safely reducing colonoscopies using the CEDAR diagnostic algorithm - External Validation of the CEDAR algorithm	multi	nee	cross-sectioneel onderzoek
Maag-Darm-Leverziekten	ALERT-CD Study	Real life management Crohn's fistula	multi	nee	observationeel onderzoek
Maag-Darm-Leverziekten	LIMERIC-II Study	Limited wedge resection for Colonic T1 cancer	multi	ja	observationeel onderzoek
Neurologie	SAFEST Study	StAtins in Frail oldEr patients with ischemic Stroke or Transient ischemic attack	multi	ja	interventie-onderzoek
Oncologie	DIRECT-2 Study	Fasting mimicking Diet to Improve Chemotherapy in HR+, HER2- breast cancer	multi	ja	interventie-onderzoek (voeding)
Oncologie	LYRICX Study	Liposomal irinotecan, Carboplatin or oxaliplatin in the first line treatment of esophagogastric cancer: a randomized phase 2 study	multi	ja	interventie-onderzoek (geneesmiddel)
Oncologie	CRITICS-II Study	A multicentre randomised phase II trial of neo-adjuvant chemotherapy followed by surgery vs. neo-adjuvant chemotherapy and subsequent chemoradiotherapy followed by surgery vs. neo-adjuvant chemoradiotherapy followed by surgery in resectable gastric cancer	multi	ja	interventie-onderzoek (geneesmiddel)
Oncologie	MEDOCC-CREATE Study	Circulating tumor DNA based adjuvant chemotherapy in stage II colon cancer patients	multi	ja	observationeel onderzoek en weefselanalyse
Orthopedie	REPAIR Trial	Repair versus reconstruction of proximal anterior cruciate ligament tears	multi	ja	interventie-onderzoek

Orthopedie/ fysiotherapie	Forgotten Joint Score-12 study	The Forgotten Joint Score-L2 in patients with anterior cruciate ligament (ACL) reconstruction compared with ACL + Lemaire reconstruction, a retrospective 2-year follow-up cohort study.	mono	nee	observatieel onderzoek
SEH	ACUTECARE @HOME	Patient perceived home monitoring potential in acute care: A Flashmob Study	multi	nee	interviews/enquêtes
Verloskunde	Meten tot verbeteren	Meten tot verbeteren: is there a patient acuity measurement tool suitable for use in maternity service provision in the Netherlands?	multi	nee	statusonderzoek
